

EWJ68044LX – PVC Banner HeavyWeight Satin Frontlit for LATEX 440 gr.

EWJ68044LX when you need a fire-rated ripstop banner material, designed for applications that require a fire rating even when printed. Not only does this product have a smooth white printing surface developed to give exceptional print quality even with a high ink load; but it also has an incredible core and tensile strength. It is a great all-rounder, ideal for both indoor and outdoor front-lit banner display graphics.
