GOSIGN FEATURES

Aside from all common functionalities of a cutting program such as sorting, weeding box, multi copy and more, GoSign has exclusive features, unique to the GoSuite software.

Custom configuration of action sets

Flexible action sets enhance automation and enable to tailor the workflow to everyone's needs.

Material Manager

Allowing to preset speed and other settings linked to the specific method used: Kiss-Cut, Thru-Cut, and so on.

Plug-ins for Adobe Illustrator and CorelDRAW

The plug-ins have been updated to work with Illustrator and CorelDRAW and can be installed via a GoSign Tools download.

Job Log functionality

GoSign automatically logs every job sent to the cutter. Job Log enables post calculation, monitoring of the unit's uptime, tracing of jobs, links to ERP systems and much more.

Multiple import filters

GoSign is compatible with many design programs via PDF and DXF import filters. Also, SGP and OXF files can be read, also making files prepared by 3rd party RIPs compatible with GoSign.

Import of Plot files (Pro Pack)

GoSign also imports plot files. By opening the job in GoSign first, typical mistakes such as bad pressure values, bad sorting, ... will be solved.

Hot folder system (Pro Pack)

With the hot folder functionality, files dropped in a folder can automatically be opened in GoProduce. The flexible action sets ensure that what happens next is fully customisable.

OPOS CAM & Twin support (Pro Pack)

The Twin support allows to combine a Summa S Class 2 OPOS CAM roll cutter with a Summa F Series flatbed cutter into one single Twin workflow - Kiss-Cut and Thru-Cut. Besides, also other advantages come with the Twin support.

Barcode functionality (Pro Pack)

By using GoSign, a barcode workflow can be set up with PDF and DXF files. A great advantage here is the possibility to modify plot files and optimize cutting requirements to enhance the overall cutting quality.

Note: All previous barcode functionality on Summa Roll cutters remain intact.
The barcode server functionality and Camera control (for OPOS CAM) remain available for free in Summa Cutter Control.
